Integrated Management System Policy Siam City Cement (Lanka) Limited/ Mahaweli Marine Cement (Pvt) Ltd

We, Siam City Cement (Lanka) Limited/ Mahaweli Marine Cement (Pvt) Ltd are committed to be the preferred solution provider in supplying high quality cement and related technical services which will build the foundations of Sri Lanka's future.

In fulfilling above task, all manufacturing plants pledge to manufacture and dispatch high quality cement and Ready-mix concrete whilst complying with applicable compliance obligations and other requirements to which the organization subscribes, related to its environmental aspects, its health and safety hazards including road traffic safety incident and accidents, its energy use, consumption, and efficiency.

We are committed to:

- Ensuring consistent compliance with legal and other requirements related to product quality, environment, energy, health and safety and road traffic safety to meet customer expectations.
- Protect the environment through optimizing the use of natural resources whilst minimizing environmental impacts and prevention of pollution by integrating sustainable environmental practices into our business processes.
- Provide a healthy and safe workplace for the prevention of work-related injury and ill health through eliminating hazards and reduce OH&S risks to our employees, contractors, visitors, and other stakeholders.
- Ensure that the interaction with the road traffic safety system reduces and ultimately eliminates deaths and serious injuries related to road traffic crashes which can influence with our employees, contractors, visitors, and the other stakeholders.
- Continual improvement of integrated management system to enhance performance of product quality, environment management, energy management, health and safety and Road Traffic safety while promoting consultation and participation of workers in operational processors.
- A high-performance product portfolio that uses resources in the most efficient, cost effective and environmentally responsible manner while designing, developing, maintaining, and procuring energy-efficient products and services.
- Ensure the availability of necessary resources and information to achieve objectives and targets.
- Focus on human resource excellence practices through providing appropriate training to support on quality, environment, energy, health & safety, and Road traffic safety.
